Decode of abbreviations and symbols Situation in words √ means it is included E means it covers an extended period
Colour/Mono C = in colour M =monochrome
Logo of provider: M=MetService B=Blue Skies
Weather maps ☹ means Map legend/decode is missing
Satellite images ☺ means isobars are superimposed.
TSWWX graphic combines Temperature, Swell, Wind and Weather T means just temp,noW means Wind is missing, etc
Graphic backdrop T=Temperature, Ra=rain, Li=lightning count, Rd=roadmap, riv=rivers, top=topograpy
areas, local centres, cities: Decode 9T3 means 9 sites in text covering 3 days
Decode 8G7 means 8 sites in graphics covering 7 days
* means these regions come with a temperature forecast BUT the site for this T not given
Tides decode 09G3 means 9 sites with a graphic and covering 3 days. T means Text
Sun/Moon(=Rise/set tin Rise set times and moon phases. Number given refers to sites. # means forecast is given for an undefined area
Count = total number of items included in the template.
Extras: Fish=Fish bite times, Today= today in history, r(iv)/lake=river/lake levels, ski/surf=ski/surf reports, ext=extreme readings,LT=local Temperature readings
